

M-491 Derrick/Tower Block

Designed in cooperation with oilfield and tower contractors.

The new design provides the dependability of standard McKissick® snatch blocks, along with features that make it perfect for the challenging need of Tower and Tugger Hoist applications.

- All blocks 356mm and larger are furnished with McKissick® Roll-Forged™ sheaves with flame hardened grooves.
- *Suitable for hoisting personnel* - contingent upon all employees, including the winch operator, being trained to follow any applicable federal, local and industry standards.
- Sealed tapered roller bearings extend bearing life and allow for faster line speeds than recommended with standard snatch blocks.
- Forged steel swivels, tees, yokes and shackles are Quenched & Tempered.
- Sheave lubrication is through center pin for easy maintenance.
- Shackle fitting swivels for easy positioning.
- Lower bolt provides connection when used as foot block.
- **A wide variety of configurations**
 - Wire Line Sizes : 10mm through 25mm
 - Sheave O.D. : 203mm – 406mm
 - Capacities : 4, 8, 12 or 15 metric tons
 - Finish : Painted or galvanized
- **Manufactured by an API Q1 Certified Facility**
- **Design factor of 4 to 1**

Licensed Under
API Spec 8A-0023
and 8C-0021
